

# INSTRUCTION for APN Setting ver1.0)

## 1. For Android Phone (Must have)

- 1) Go to your Android's main Settings.
- 2) Under Wireless & Networks, go to "mobile networks."  
(You may need to hit "more settings" to get to this option)  
Tap on Access Point Names (APN)
- 3) Press menu, and then hit "New APN."
- 4) Enter in all the necessary information in each field by tapping on it and then pressing OK to save.

APN: open.mopera.net

You do not need user ID and Password

- 5) After you've finished entering all the settings, press menu again and then Save.

## 2. For iPhone ( If you need it )

- 1) iPhone: Settings > General > Network > Cellular Data Network
- 2) Fill out APN information to APN field.

APN : open.mopera.net

You do not need user ID and Password

If you can not Access internet after setting up APN,

Please reset your iPhone as follows:

Hold the sleep/wake button at the top right of the device and the home button at the bottom center of the face at the same time.

Hold them both until you see the screen go black. In some cases, you may need to keep holding them even after the red power off slider appears. If it does, just keep holding it.

Wait until the white Apple logo appears.

When this happens, you can let go - the iPhone is rebooting.
